Laser Ultrasonic Visualizing Inspector

Tsukuba Technology Co., Ltd. was founded in July 2005, in the world renowned high-tech science city of Tsukuba, Japan. It is a high-tech venture company originating from the National Institute of Advanced Industrial Science and Technology (AIST).

The company has successfully developed world-class non-destructive testing technology such as the world's first Laser Ultrasonic Visualizing Inspector as well as the Ultra-Compact Cold Cathode X-ray Inspection equipment..

Compact Cold Cathode X-ray System

Its product line has been used in aerospace, nuclear power, petrochemical pipelines, and many difficult problems have been solved in a wide range of fields such as transmission lines, pressure vessels, railways, automobiles, and materials development.

The company has won multiple national awards including The 6th Monozukuri Nippon Grand Award and the 2014 Japan Venture Award and has been featured by various media including NHK World.

2014 Japan Venture Award

The 1st JEITA Venture Award

2015 Ibaraki Industry Grand Award

The 6th Monozukuri Nippon Grand Award

2017 New Value Creation Award
